Education

Vellore Institute of Technology

Expected 2026

Integrated M.Tech. in Computer Science and Engineering (Computation and Data Science)

CGPA: 8.64/10

Relevant Coursework: Machine Learning, Probability & Statistics, Data Structures, Algorithms

AKLANK Day Boarding, Kota

2020

Senior Secondary (Class XII)

88.2%

Technical Skills

Languages: Python, C++, SQL

Frameworks/Libraries: Flask, scikit-learn, TensorFlow, NumPy, Pandas, Seaborn

Tools & Platforms: Git, MySQL, Dialogflow, Render, AWS (Academy Graduate)

ML Skills: Data Cleaning, Feature Engineering, NLP, Model Deployment, Statistical Evaluation

Projects

Amazon E-commerce Agent — RAG-Based Product Recommender

- Built an AI-powered product recommender using **Retrieval-Augmented Generation (RAG)** with **ChromaDB** and **SentenceTransformers** for semantic product search.
- Implemented a **Flask-based interactive UI** for natural-language product queries and real-time AI-generated recommendations.
- Designed an end-to-end pipeline covering **data preprocessing, vector embedding generation, retrieval, and contextual response generation**.

Potato Leaf Disease Classifier

- Developed a high-accuracy CNN using TensorFlow on PlantVillage dataset to classify potato leaf diseases.
- Achieved **97–100% accuracy** using augmentation and preprocessing for robust real-world deployment.
- Automates early detection, aiding sustainable farming practices with production-ready AI model.

InboxGuard – SMS Spam Classifier

- Engineered an NLP pipeline using TF-IDF and Naive Bayes to classify SMS spam with 97% accuracy.
- Built and deployed via Flask & Render; achieved <1s prediction latency with REST API support.
- Implemented comprehensive text preprocessing including tokenization, stopwords removal, and stemming.

Certifications

- AWS Academy Graduate – Cloud Architecting (AWS Academy)
- AWS Academy Graduate - AWS Academy Cloud Foundations (AWS Academy)
- Applied Machine Learning in Python (University of Michigan, Coursera)
- Data Analysis with Python (IBM, Coursera)

Achievements

- Solved **500+ unique DSA problems** (GFG, LeetCode); consistent coding streaks.
- Maintained strong contest performance: **GFG 1807 (Level 4, Top 7.97%), LeetCode 1602, Top 22.84%**.
- Contributed to ML projects with production-ready deployment using Flask and cloud platforms (Render, AWS).
